

Working Group Meetings: Expectations for This Workshop

Topics:

Working Groups: Rationale and Themes

Report on Progress and Accomplishments: What have you been doing?

Obstacles: Any Difficulties?

Meet often this week

Working Groups

Rationale and Expectations

- Exchange of experiences, knowledge and lessons learned as well as advanced technical training on specific priority subjects.
- Develop trainings that generate additional knowledge and skills on climate modeling and climate change impacts in the LAC region.
- Each Working Group will produce interim reports after each Workshop, as well as a final report at the end of the project.
- Each Working Group will develop one or more publications in reputable scientific journals.

Working Groups

Specific Themes

ENSO

Tropical Cyclones

Mountain Precipitation

Progress and Accomplishments: What have you been doing?

Our monthly WG Skypes have been sporadically attended (partially our fault)

But it is also clear that some significant activities have been taking place

We'd like a brief report on this from each WG (tomorrow morning)

Please tell us about the great and wonderful things you have been doing!

These could be stand-alone project accomplishments, or integrating project material into your other work

Obstacles

What Have You Encountered?

Do They Involve *Logistics*?

Do They Involve *Research*?
